Animals

Equine & Animal Program

We will be offering an optional animal and equine (horse) program to focus on developing relational skills and positive self-esteem. Throughout the week campers will have the opportunity to learn animal care, safety, handling and horseback riding. Limited spots are available (supplementary fee required).

This March break

Dr. Angela Fountain & Associates is proud to offer a special Child and Youth Day Program for children ages 6-14 years old experiencing social-emotional problems and/or learning disabilities. The program, which runs 9am – 4pm each day, is specially designed to be fun and enjoyable while at the same time providing our young clients with the essentials for developing strong healthy relationships, confidence learning and practical problem solving skills. Embedded in a thematic week of fun and adventure in a country setting are opportunities for individualized and group skill building in the areas of social skills, anger and anxiety management, impulse control, sustained attention and learning skills.
